Change your look indoor and outdoor!

pg. 64

HIGH POWERS

A clip-on for high power lenses.

pg. 76

HD ACETATE

Frames in acetate HD.

pg. 82

METAL COLLECTION

Style and lightness

pg. 92

Discover **neyeture** a range of frames with magnetic clip-on made of biobased material.

CLIP-ON

LIGHT & FLEXIBLE

Each model in this collection is based on the following 3key features:
comfort, practicality and style.

Comfort

The Light & Flexible collection was made with afeather-light material and, at the same time, flexible and resistant. Ideal forchildren, even in preschool age.

Practicality

Each model is sold with a practical clip-on that adheres perfectly to the frame thanks to two magnets on the front that guarantee perfect alignment and correct polarization effectiveness of the sun lenses. The practical 2 in 1 solution, to always carry with you. The clip-on, light and with minimal thickness, once applied becomes one with the frame, for an almost invisible effect.

Style

The collection has been designed by proposing frame shapes in harmony with the main face types andcolours to enhance them. There are 5 different ranges of Light & Flexible frames with magnetic clip-on, designed to offer different styles.

Around People

From **the conception** of a **product** or **service** to customer **assistance**, we work thinking about the **specific needs of the people we turn to**.

Before creating a product or devising a service, at Centro Style **we analyze the consumer's needs** with reference to product niches and the **trends of the following season** to identify what the short-medium term needs of our customers may be. **A team** effort pushing us to improve ourselves and to offer increasingly interesting and **competitive products on the market**.

The Light & Flexible Clip-on collection represents the maximum expression of our **“Around People” philosophy**.

FACETED

Flexible, resistant and ultralight frame with magnetic clip-on.

The faceted front gives a touch of design to enhance shapes and colours.
