To help you select the ideal proposals for the needs of your PRACTICE, we have enriched the catalogue with reference to the various age groups of children. Below, you will find a summary of our eyewear design philosophy, which responds, from time to time, to changing needs.

Watch
the Young Optometry
video interview
on Active Frames

0-2 years

EARLY CHILDHOOD

The child in this age group has a nasal septum that is not yet formed and needs to wear anatomically correct, stable, soft, light and safe glasses. Active Frames offers only frames made with soft and safe materials to allow movement. It is important that the eyewear always remains stable to ensure the correct maintenance of the optical centre position even when the head rests on a pillow, for example, in the cradle. For this reason, a cord always accompanies Active Frames.

2-5 years

PRE-SCHOOL

The nasal septum of children begins to form and in this age group the exploration of the world and the claim of autonomy reign supreme. For this reason, Active Frames respond, in this case, to the need for stability, comfort and lightness to guarantee both the child's dynamism and the full functionality of the corrective lens.

5-10 years

SCHOOL AGE

The beginning of school leads the child to a greater visual effort and an aesthetic demand projected towards the world of adults. Active Frames are therefore designed with different materials that can always guarantee comfort and lightness. The design takes into account a much more defined structure of the nose and ears.

10-14 years

PRE-TEENS

In this phase of life, eyewear begin to define one's own style, a way of being, becoming a real element of self-definition. This is why the Active Frames aim here to combine the maintenance of the optical centre with aesthetic qualities that recall those of the adult. The breadth of shapes and decorations available to the adolescent becomes fundamental.

Active Frames

Soft Trial Frame for Baby

One-piece frame in soft rubber, latex-free and free of metal parts with anatomical central bridge, to offer the little ones maximum comfort during the visual acuity test.

CE Certification
the frame is safe in case
a child chews it.

- The **wrap-around sides** and the **adjustable silicone tube**, keep the frame close to the face.
- **Three-lens** holder suitable for standard Ø 38 mm, trial set lenses. Determination of the astigmatism axis is according to the **TABO system**.
- The **bridge** is centred and splayed, thereby helping to maintain the correct optical centres.

SOFT COLLECTION

One-piece frame in soft rubber, latex-free and free of metal parts with anatomical central bridge.

CE Certification
the frame is safe in case a child chews it.

One-piece frame
in soft rubber with anatomical central bridge.

Wrap-around sides
with a silicone retainer band to maintain the correct optical centres.

The groove is designed for high power lenses to avoid altering the curvature of the front. Ideal for occlusive treatments.

SAFETY

The frames 0-3 years are compliant with the following EU norms regarding safety of toys: EN 71-3: 1994/A1: 2000/AC:2000/AC:2002 "Migration of material" and EN 71-9 "Organic chemical compounds: monomers, solvents, plasticizers". This means that the frame is safe in case a child chews it. In addition it has been dermatologically tested (it does not cause skin irritation). The groove is deeper to prevent the lens from coming out in case of accident.

SOFT COLLECTION

One-piece frame in soft rubber, latex-free and free of metal parts. Silicone glasses holder tube included.

ONE COLLECTION

One-piece frame in soft rubber, latex-free and free of metal parts with Dynamic Grip Curve.

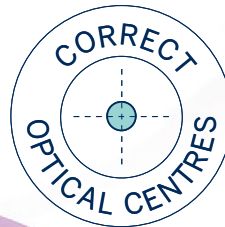

Dynamic Grip Curve allows a higher flexibility of the side without altering the curvature of the front and the correct position of the optical centres.

Hole, which allows the use of an alternative system to the silicone tube.

CE Certification
the frame is safe in case a child chews it.

The deeper groove prevents the lens from coming out in case of accident.

The wrap-around sides and the silicone retainer band keep the frame close to the face.

Centro Style offers 2 years warranty for your customer.

SPORT & LEISURE COLLECTION

Lightweight, Resistant, Wrapping

- **Wrap-around sides** to maintain the correct optical centres.

- **Frame** made of grilamid TR90 and rubber with double injection technology to reduce the risk of rupture or deformation. Comfortable and lightweight. Cold glaze only. Do not use alcohol, acetone, solvents or thread locks.

- **CE Certified** product complying with the current European regulations.

- Thanks to the **soft rubber** on the front and on the sides and the specially designed nose bridge, the frame remains close to the face.

CENTROSTYLE WARRANTY

Centro Style offers 2 years warranty for your customer.

SPORT & LEISURE COLLECTION

Grilamid TR90 frame with soft rubber on front and sides. Flexible wrap-around sides. The wrap-around sides keep the frame close to the face and maintain the correct optical centres. Supplied with silicone retainer band.

on request
Size: 21x29,7 cm

Ref. FK0031

composed of:

- **12 glasses of your choice** with Blue Light Filter Comfort Ophthalmic Lenses
- **Alu case** with digital printing for each frame
- **Window display** (Size: 33x24x27 cm)

Ref. 11369

Window Display

(Size: 33x24x27 cm)

BLUE LIGHT COLLECTION

Game, Study, Hobby

- **Wrap-around sides** to maintain the correct optical centres.

- **Frame** made of grilamid TR90 and rubber with double injection technology to reduce the risk of rupture or deformation. Comfortable and lightweight. Cold glaze only. Do not use alcohol, acetone, solvents or thread locks.

- **Blue Light 1.56ND plano ophthalmic lenses**

CE **CE Certified** product complying with the current European regulations.

- Thanks to the **soft rubber** on the front and on the sides and the specially designed nose bridge, the frame remains close to the face.

CENTROSTYLE WARRANTY

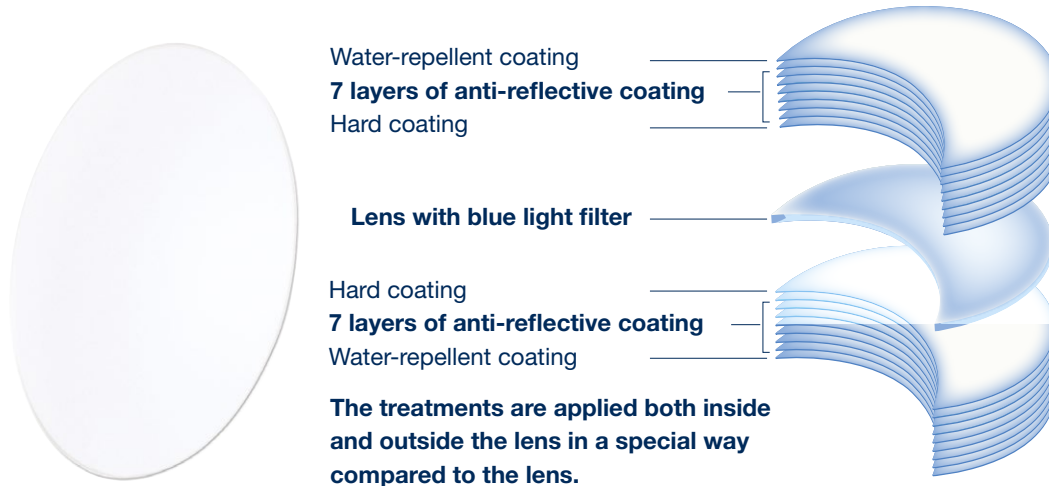

Centro Style offers 2 years warranty for your customer.

BLUE LIGHT COLLECTION

Blue Light Filter Comfort Ophthalmic Lenses

The **Blue Light Filter Comfort lens blocks 100% of UVC and UVB rays and 99% of UVA rays**, the harmful blue component decreases by over 55% (at 420 nm), as well as the state-of-the-art AR **super hydrophobic treatment** allows an **excellent vision in all conditions** and **increases comfort when using backlit devices** such as PC and tablet screens.

1.56 INDEX LENSES Thin and light, they do not weigh down the frame.

BLUE LIGHT FILTER TREATMENT

Protects the eyes from the harmful effects of blue light by reflecting it better than a lens with anti-reflection treatment - Blocks the blue light component up to 40% making the use of electronic devices more comfortable. Ensures 100% protection from ultraviolet light (UV 400).

HC HARDENING TREATMENT (HARD COATED)

Hardening treatment on both sides of the lens - Protects from scratches - Extend the life of the lens. Recommended on all organic lenses.

HMC HARD MULTICOATED ANTI-REFLECTION TREATMENT

Is an anti-reflection treatment combined with a hardening treatment, it guarantees excellent transparency, reduces reflections from sunlight and artificial light, it increases light transmission up to 99%. Indispensable for all high index lenses, it improves the aesthetic appearance and visual comfort.

ANTI-REFLECTION, WATER-REPELLENT, ANTI-SOIL TREATMENT

The water-repellent treatment allows water to slide quickly off the surfaces of the lens, repels moisture and oily substances thanks to its hydrophobic and oleo-phobic properties. This treatment allows a simple and easier cleaning of the lens and reduces the possibility of surface abrasions.

BLUE LIGHT COLLECTION

Blue Light Filter Comfort Ophthalmic Lenses - Technical Features

Base **B 4** Ø 70 mm | →(← 2,0 mm

Ref. 50300

Cat. 0 (T 98%) 1 pc.

INDICE 1,56 ND

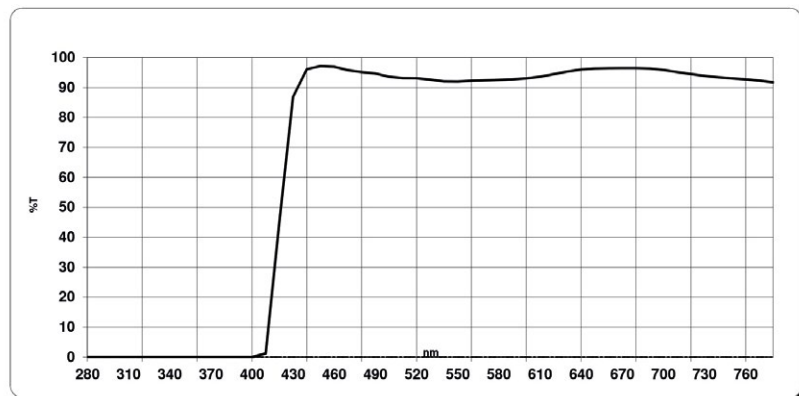

Thin and light lenses for comfort

CERTIFIED OPTICAL QUALITY

The lenses are in compliance with the international standard EN ISO 12312-1: 2013 + A1: 2015

100% UVA and UVB Protection

Composition

The **specific and innovative composition** of the **polymer** with which the lens is built **significantly reduces the potentially harmful effects** of visible light between **380 and 440 nm (HEV)**, allowing the **good and less violet component** of the light to **improve the photobiological effect**, contribute to improving well-visual being **reducing eye fatigue and glare effect** by improving contrast.

Active Frames

Each model in Active Clip collection is based on the following 3 key features: **Comfort, Protection and Practicality, Style.**

Comfort: the Active Clip collection is made with a feather-light material, which offers comfort to children. It is flexible and resistant, ideal for their activities.

Protection and Practicality: protecting children's eyes from the sun's rays is of fundamental importance. Each model is sold with a practical clip-on equipped with polarizing filters that guarantee protection from UVA and UVB sunrays. The clipon adapts perfectly to the frame thanks to two magnets on the front, ensuring the correct alignment and effectiveness of the polarization of the sun lenses. It is a practical 2 in 1 solution to always carry with you. The clip-on, light and thin, merges with the frame, creating an almost invisible effect.

Style: the collection offers shapes that follow the style of adults and a variety of bright colours to satisfy all tastes, adding a touch of joy. We are confident that the Active Clip collection will offer your children maximum comfort, protection and a style that will make them feel special.

CLIP COLLECTION

Comfort, Practicality, Style

● **Metal hinges** for higher resistance.

● **Adjustable** rubber temple tips.

● **TR90 frame**, Ultem sides. Comfortable and light, it adapts to the face thanks to the anatomical bridge. Cold assembly. Do not use alcohol, acetone, solvents or similar.

● **CE Certified** product complying with the current European regulations.

● **Clip-on** with polarized filters, protection from UVA and UVB sun rays.

● In the most recent models, new hook system on the top for greater adherence and hold to the frame.

Sun exposure: the importance of protecting children's eyes.

Statistically, most exposure to the sun (75-80%) occurs before the age of 18/20. It is therefore extremely important to evaluate the effects that this solar radiation, both direct and reflected, has on the eyes of children and adolescents.

Children's eyes are still developing and cannot filter harmful UV rays in the most effective way, which is why it is necessary to protect them with sunglasses from the first year of age. Furthermore, various studies have highlighted how continuous and prolonged exposure to UV radiation can lead to serious pathologies and a high risk of macular degeneration in old age. Protecting the eyes of children and adolescents from the direct and reflected rays of the sun is therefore very important as it protects from UV rays precisely in the period in which exposure to sun rays is greatest and natural protection is least. This is even truer today, as studies have shown that playing outdoors is essential for children to reduce childhood myopic progression, as well as ensuring the correct intake of vitamin D. If you use digital devices, such as smartphones and tablets, in the open air, the threat of reflections of the sun's rays coming from the screens must also be considered for which it is necessary to take the necessary precautions.

The advice of specialists is therefore to correctly wear glasses with protecting lenses from UVA and UVB rays that are able to absorb at least 99% of UV rays above 400 nanometres. It is also important that the sunglasses are of quality, made with safe materials, sufficiently enveloping to prevent light from penetrating from the sides, comfortable and with guaranteed quality lenses. All glasses from the Centrostyle Active Sun line have:

1. Polycarbonate lenses, impact resistant, 100% UVA/UVB protection
2. They ensure maximum wearing comfort, as they are made with soft and flexible materials.
3. Compliant with EU regulation 2016/425 on Personal Protective Equipment.

MYOPIA CONTROL

MYOPIA CONTROL

Myopia is becoming increasingly common among children due to both hereditary factors and increased time spent in close-up activities with the use, above all, of digital devices. It is estimated that 5 billion people, half the global population, could be affected by myopia in 2050.

Myopic progression control lenses are used for children aged 6 to 18 years. The defocus in the periphery, created by this special type of lens, reduces the elongation trigger associated with uncorrected myopia or traditional spectacle lenses.

The most appropriate models for fitting this type of lens are highlighted with the 'Myopia Control' logo both in the catalogue and on the demo lens

Frames suitable for mounting children's
myopia management lenses.

Tests carried out by the **Prontottica laboratory**

HYPOALLEGENIC OCCLUDERS FOR FRAMES

For orthoptic therapies of amblyopia and strabismus - In fabric

BABY AND JUNIOR

Size: 105x50 mm (Baby)

Size: 118x60 mm (Junior)

Occluders for children and adults frames made of high quality ecological fabric, reusable and washable.

They are made with certified materials, hypoallergenic and breathable, and eco-friendly. The fabric is printed using inks and water based dyes.

They are designed to comfortably fit on any type of frame and provide a total occlusion, effective for the treatment of amblyopia (lazy eye).

These occluders offer the perfect combination of comfort, style and fit to make treatment time fun and effective for children, and elegant for adults.

Most occluders have graphics suitable for both the right and left eyes.

HYPOALLEGENIC OCCLUDERS WITH ELASTIC

For orthoptic therapies of amblyopia and strabismus - In fabric

CHILDREN

Size: 70x55 mm

Occluders for children and adults with elastic to place directly on the eye, usable even without frames.

Entirely made of breathable certified fabric, safe in contact with the skin to ensure a soft and enveloping fit around the eye. Reusable and wash-able.

Ideal for occluding one eye: they are kept in position with a quality elastic, latex-free, which makes them comfortable to wear for long periods.

The occluders have a black lining to exclude most of the light and a reinforced fabric core that keeps its shape even after the washing.

These occluders have colorful and fun drawings graphics suitable for both the right and left eye.

PACKAGING

Each collection was combined with a game designed with increasing complexity based on the age group. With this initiative, Active Frames are also involved in the company path towards an increasingly **aware environmental sustainability**. Not only do we offer a **100% recyclable paper box**, but we have also combined a **proposal for recycling and reusing the packaging** that can entertain children with games that stimulate their **imagination and creativity**.
